

## NAVIGATION ADVISORY NOTICE

### RIVER GREAT OUSE, ELY OUSE SYSTEM AND TRIBUTARIES

**DATE: 20 December 2019 – Until Further Notice**

#### **DETAILS:**

We are currently experiencing high levels of rainfall across the region.

Over the next few days it may become necessary to increase and maximise the discharge of flood water at the Denver Complex to lower the flood risk to communities living by our navigable rivers.

In order to do this we may have to lower river levels at times to create additional capacity to accommodate flood waters travelling down the river system.

Please be aware that this could result in larger, deeper drafted boats grounding in some locations. Please ensure that you check your vessel regularly and allow enough slack in your vessel mooring lines to accommodate fluctuating water levels.

To find out more about river levels and to sign up to Flood Warnings Direct to receive River Advice for Boater updates, please call our Customer Contact Centre on 03708 506 506. Or call our 24 hour Floodline service on 0345 988 1188.

We apologise for any inconvenience caused.

Irven Forbes

Waterways Manager

For further information please call the Environment Agency on 03708 506506 between 9am and 5pm Monday to Friday and ask for the Great Ouse Waterways team.
